Attention: Mr. M. W. VanLier

Dear Mr. VanLier:

This is to update you regarding Eagle Signal's, IAD051001337, efforts to have the present on site hazardous waste removed from our facility. All materials that will not be incinerated have been neutralized, solidified in approved drums, and are awaiting removal from the plant. Based on the memo that ESG Watts received from CECOS, copy attached, we anticipate a pickup sometime in early June.

As stated in previous correspondence, we will apply for small generator status as soon as we are clean. If you have any questions, please call.

Sincerely,

Richard W. Erickson
Manager
Manufacturing Services
